EXPERIENCE Enniskillen

Be a **part** of it.

List of Enniskillen AED's

(Automated External Defibrillators)

Enniskillen BID has curated a list of AED's located throughout Enniskillen, providing vital information for residents and visitors alike. This list highlights the availability of defibrillators in the area to enable quick access to life-saving equipment during emergencies.

An AED – Defibrillator is a compact, portable device, which can be used on an individual where it has been recognised that they have had a Sudden Cardiac Arrest.

AEDs can restore a normal heart rhythm in someone who has had a sudden cardiac arrest. AEDs enable more people to respond to a medical emergency for which a defibrillator is required.

All the AEDs have been registered with the Northern Ireland Ambulance Service therefore if anyone should telephone 999 seek assistance the NIAS will direct you to the nearest in service and available AED.

In an emergency you must call "999". The operator will direct you to the nearest in service & available AED. The operator will provide you with any access codes you may require to open AED boxes.
